

Introducing Green Map System's
newest education resource:
Energy & Environment Exploration Modules

Green Map System is a global organization which also has a local Green Map project for New York City

see it at GreenAppleMap.org

Welcome to the Green Apple Map

Experience NYC's wealth of ecological resources and community spirit!

New!
Powerful Green Map

click for energy impacts
conservation and
renewables
city-wide

Published in 2006, our 5th citywide
Green Apple Map is all about NYC's Energy

Charting conservation, renewables and challenges, this map led us to ask:

How can the Powerful Green Map's concepts be utilized by students?

Can we create field trip-based modules that use the community as classroom and connect teens with green living, nature and culture?

Yes! New in September 2007, Green Map's set of EEE Modules cover 6 important topics

Modules by Green Map® System

- 1 Using the Powerful New York City Green Map
- 2 Charting School Energy Resources
- 3 Reduce, Reuse, Recycle
- 4 Mapping our Street Trees and Green Space
- 5 Car-free Mobility
- 6 Waterways as Transportation

Which Topic Will You Choose?

Energy & Environment Exploration Module 1

Using the Powerful NYC Green Map

Energy & Environmental Exploration
Modules by Green Map System
Global Website: GreenMap.org/youth
NYC Website: GreenMapNYC.org
Email: ny@greenmap.org

Facilitating Director: WENDY E BRAVER
Module Developer & Illustrations: BETH FERGUSON
Designers: DR. ROBERT ZUBER, LARISSA & BERNARDINA REIA DIERKAWA
Coordinator: CARLOS MARTINEZ
Illustrations: JUAN MARTINEZ

In this module, you will learn about NYC's remarkable range of power options while using the Powerful New York City Green Map.

What is a Green Map? It is a locally-made map that uses universal Green Map® icons to highlight the green living, natural and cultural resources in the neighborhood's community. There are hundreds of Green Map projects around the world, and each is as unique as the people making it!

You and your class (or group) will determine your Green Map's specific focus, its design and whether to include narratives, tips, photos and details about the sites identified by the icons. Plan how you will share it - will it be printed or a digital mural or poster Green Map!

Created for NYC students, Green Map System's Energy & Environment Exploration Modules introduce activities and learning resources designed to help you create a greener and healthier city. Find out more inside!

New Education Modules

New! Energy & Environment Exploration Modules

This set of 6 education resources (nicknamed the EEE Modules) is designed to help youth experience and interpret New York City's energy and environment from a sustainability perspective.

Created in mid-2007, educators and youth group leaders can download these new tools free with the understanding that:

- This is the beta version of the EEE Modules.
- When you download a single or set of modules, it will be packaged with a Guide - please review before using the EEE Modules.
- Your feedback is required on our short online Survey (link to come).
- Your resulting Green Maps and other creative outcomes will be instructive to us and to future users of the final version of the modules.
- Green Map System intends to make an adaptable global version of the EEE Modules in the coming months.

We very much appreciate having complete contact information from all users of these modules. Please fill in this form, then click submit.
